Hello fellow Amigans and Happy New Year!

I'm setting up a new CF for my A1200 and was about to use the latest version of Roadshow. Unfortunately I don't have the e-mail from my Roadshow order (ACP&TCP order#828 19.05.13) any more and also can't remember (nor locate) where the key file was copied on my previous CF.

Cheers,
Danny

Thomas

There is no keyfile. In response to your order you got a download link for the original archive.

Thanks Thomas!

I was under the impression that I got a separate key...well that explains why I didn't find anything in the docs 🤔.

Anyway, I'll just go ahead and use the old version then.
