I don't see any such thread already, so here goes... 😊

- * ping
 - timeout options (like BSD "-t : Specify a timeout, in seconds, before ping exits regardless of how many packets have been received.")
 - exit on first ping replay (like BSD "-o : Exit successfully after receiving one reply packet.")
- * rsh client?
 - ssh is non-trivial for a whole range of reasons on Amiga, but a working rsh would be great for executing remote commands over the LAN. On Aminet there is a even a rshd, but I have yet to find a working rsh client. (The one that comes with AmiTCP only says "Unable to exec AmiTCP:bin/rlogin", which isn't to strange, considering that AmigaOS doesn't really do "exec()" AFAIK.)
