Aminet is the largest legal collection of software for the Amiga.  
Founded in 1992, it has become the first point of contact for users who are looking for software for the Amiga.

In general, the software is uploaded directly by its programmer. For your information, Aminet now stores approximately 30 GB of data.

Aminet is reachable at URL <http://www.aminet.net> and by FTP-Server at <ftp://main.aminet.net>  
There are several [Mirrors](#)
