The OS4 Depot is a collection of software for the AmigaOS 4 and can be found via the URL <http://www.os4depot.net> .

With more than 3,000 files, it should now be the largest collection of software titles for the AmigaOS 4.

As in Aminet, the software is usually released by the programmers themselves and can download it for free.

Since our last report the following uploads have been added:

[hwplayer.lha](#) - [development/misc](#) - 8.0 - 9 MB - 18.03.2019 - [Run applets created by Hollywood](#)
