23.03.2019 Lhx V0.86.1 BETA published

<http://os4depot.net/?function=showfile&file=utility/archive/lhx.lha>

Lhx is a file compression program written by Marko K. Seppänen, Lasse Collin and Igor Pavlov, which compresses files into an AmigaOS compatible XZ/LZMA compressed archive in which all protection mechanisms of the AmigaOS file system and possible comments are preserved.

XZ/LZMA is the same compression method as 7-Zip.
