[pic:20f7391583]./uploadpic.php?thumb=2_winuea_v10_1.png[/pic:20f7391583]

New features:

- * uaegfx and Picasso IV Overlay/PIP support.
- * All GUI listviews support column order and column width customization.
- * Custom ROM selection (4 slots) added.
- * Direct3D 9/11 shader embedded config entry support.
- * 68030 MMU instruction disassembler support and other disassembler fixes.
- * 68030 MMU emulation will now also create short type bus error stack frames when possible, matching real 68030 behavior.
- * Windowed mode keeps aspect ratio if CTRL is pressed while resizing.
- * Added debugger invalid access logger (memwatch I).
- * Reject Alt+<some> Windows system menu key shortcuts. Invalid short cut combinations can generate annoying Windows alert sounds.
- * KS ROM selection supports loading and relocation of hunk and m68k elf executables.

Bug fixes:

- * Direct3D 11 shader support fixes.
- * CDTV CD drive read/play startup delays adjusted. Fixes Town without no name speech audio track stopping too early.
- * Accelerator board CPU fallback (to mainboard CPU mode) works again.
- * Many video port adapters (which includes grayscale mode and genlock) didn't support all doubling modes.
- * Minor custom chipset fixes (Small graphics corruption in certain special situations)
- * Moving mouse outside and back to WinUAE window in Magic mouse activated WinUAE window even if some other window was already active.
- * AVI recording with non-standard refresh rate was reset to default if GUI was entered and exited during recording.
- * uae-configuration returned return code 10 even when matching config entry was found.
- * "Add PC drives at startup" enabled and same drive's root directory also mounted manually: drive was mounted twice. (Introduced in 4.1.0)
- * Genlock transparency didn't always activate even when genlock emulation was enabled.

New emulated hardware:

- * Pacific Peripherals Overdrive
- * IVS Trumpcard
- * IVS Trumpcard 500AT
- * ICD Trifecta
- * BSC Tandem
- * ACT Prelude and Prelude 1200
- * Harms Professional 3000
