The cheats database of Amiga Future is updates weekly by David Jahn, even at first sight if it is not immediately apparent.

The cheat database on the Amiga Future webpage is probably the biggest German collection for the Amiga.

This is not just about cheats. Many solutions, tips and tricks, as well as Freezer addresses can be found in this collection.

Meanwhile you can find more as 3400 Games Cheats and solutions in the database, and there is always more.

The database is currently completely in German. If we receive enough donations for the website, we have planned to integrate a proper online database, which will also be available in English.
